## Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 22-30 are drawn a method of reducing neurotransmitter release, classified in class 424, subclass 236.1.
  - II. Claims 31-35 are drawn to a method of relieving pain, classified in class424, subclass 238.1.
- 2. Groups I and II are different methods. They differ because they have different goals, require different method steps and parameters.
- 3. Because these inventions are distinct for the reasons given and have acquired a separate status in the art because of their recognized divergent subject matter as shown by their different classification, restriction for examination purposes as indicated is proper. Moreover, in the absence of restriction it would place an undue search and examination burden on the examiner.
- 4. Applicant is advised that the reply to this requirement to be complete must include an election of invention to be examined even though the requirement be traversed (37 CFR 1.143).

- 5. Applicant is reminded that upon that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).
- 6. A telephone call was made to Steven Donovan on April 16, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
